PREFACE

Ravigupta's Siddhasāra has been one of the objects of my researches for the best part of two decades. At first my interest in it was directed primarily at the Khotanese version, which is the longest single text in Khotanese that still awaits translation. It soon became apparent, however, that the key to a proper understanding of the Khotanese version lies in large part in the correct interpretation of the Sanskrit original and of its Tibetan rendering, both of which were used by the Khotanese translator.

By 1971 I had completed a preliminary translation of the Khotanese version, a transcription of the complete Tibetan version on the basis of the Derge, Narthang, and Peking editions, and a transcription of the whole of the Sanskrit text on the basis of the two incomplete manuscripts A and B, the only two at that time known to me. A summary of the progress I had made towards understanding better those parts of the Sanskrit text that are of importance for the Khotanese version is contained in my article on 'The Sanskrit text of the Siddhasāra' in *BSOAS*, XXXIV.1, 1971, 91-112.

In order to transcribe accurately Sanskrit manuscripts written in the ambiguous Newari script it is necessary to understand the text. Mechanical transcription results in nonsense. Yet to understand one medical text it is necessary to be acquainted with others. As none of these has been adequately studied only a superficial knowledge of them can be readily acquired. Some of the results of this type of comparative study were made known in my article 'On Ravigupta's gaṇas' in *BSOAS*, XXXIV.2, 1971, 363-375.

As a result of the progress made by the Nepal-German Manuscript Preservation Project in microfilming the Sanskrit manuscripts extant in Nepal, I discovered in 1973 three additional manuscripts of the Siddhasāra, two of which are complete. Knowledge of these additional manuscripts necessarily resulted in postponement of the publication of my edition. A preliminary report on these manuscripts together with a discussion of the significance of their contribution to an understanding of those parts of the Sanskrit text that are relevant to the Khotanese version was prepared immediately and appeared as 'New light on the Siddhasāra' in *BSOAS*, XXXVII.3, 1974, 628-654.

My edition of the Siddhasāra on the basis of the five Nepalese manuscripts was sufficiently advanced for it to be submitted for publication in the spring of 1978. I had by then learned of the existence of yet another manuscript of the Siddhasāra, but it was not until 18.10.1978 that I had access

to it thanks to the generosity of Dr. N. S. Moos, Kottayam, S. India. Within a few days it became clear that this manuscript was of the utmost importance in constituting the text. As far as it was possible in the short time the manuscript was in my hands, I took account of the new readings provided by it. This involved a certain amount of alteration to the text and the retyping of almost all the critical apparatus.

It will be apparent from what has already been explained that the text of the *Siddhasāra* has long been in a state of being constantly improved. I have no doubt that it can be improved still further, but there comes a point at which it seems that the subject can best be advanced by presenting a summary of what has so far been achieved rather than waiting for the time when one feels that one has exhausted the possibilities of further improvement, a time which may never arrive.

There are many who have contributed to my work on the *Siddhasāra*, so many that I can name but a few here. It is a pleasure to thank first of all Dr. N. S. Moos, Kottayam, S. India, for so generously placing the South Indian manuscript of the *Siddhasāra* at my disposal. In this connection, my colleague Professor A. Wezler made the journey from Kathmandu to Kottayam on my behalf and brought the valuable manuscript back to Germany to be photographed. In other ways too he has generously given of his time in the interests of the *Siddhasāra*.

Professor J. Filliozat kindly gave me information concerning the Madras MS of the *Siddhasāra* (on which see the Introduction §12), and Professor O. von Hinüber, Mainz, took photographs of it for me in Madras. Professor S. A. Srinivasan, Hamburg, examined for me the portions in Telugu script. To all three I am grateful for their generous assistance.

To Professor L. Petech I am indebted for help with the colophons of the Nepalese manuscripts. Dr. G. J. Meulenbeld has answered many queries and generously lent me copies of books in his personal collection. Dr. F. Zimmermann kindly gave me a copy of the *Yogarātnasamuccaya*, which I was unable to obtain otherwise. The late Dr. D. P. Sharma, Patna, provided me with a number of *Āyurvedic* publications otherwise inaccessible to me.

For help in diverse ways my thanks are offered here also to the following (in alphabetical order): Sir Harold W. Bailey (Cambridge), Dr. D. George (Berlin), Professor S. Lienhard (Stockholm), Dr. A. Roşu (Versailles), Professor D. Schlingloff (München), Dr. M. Schmidt (Göttingen), Professor C. Vogel (Bonn), and Miss M. Winder (London).

A number of misprints have been avoided thanks to the careful proof-reading of my student Jürgen Jakobi.

It is a pleasure to acknowledge here the careful work of the *Imprimerie Orientaliste* in Winksele and the able administrative supervision of the Franz Steiner Verlag in Wiesbaden.

Finally I would like to thank Dr. W. Voigt for admitting this work into the monumental series of the *Verzeichnis der orientalischen Handschriften in Deutschland*, which he has so long and so ably administered. It was due also to his far-sightedness in supporting the Nepal-German Manuscript Preservation Project that this edition, based largely on Nepalese manuscripts, was made possible.

R. E. EMMERICK

INTRODUCTION

- Synopsis :
1. Ravigupta's place in Indian medical tradition
 2. Ravigupta and the concluding lines of the Siddhasāra
 3. Colophon of the Tibetan version of Ravigupta's Siddhasāra
 4. The Tibetan version of Ravigupta's Siddhasāra
 5. System of reference
 6. The Khotanese version of Ravigupta's Siddhasāra
 7. The Sanskrit MSS (palm-leaf)
 8. The MS tradition
 9. The critical apparatus
 10. The extent of the text
 11. Normalisation of the text
 12. The Paris Siddhasāra
 13. Parallels and quotations
 14. Line index
 15. The Siddhasāra-nighaṇṭu
 16. The Uighur version of Ravigupta's Siddhasāra

1. RAVIGUPTA'S PLACE IN INDIAN MEDICAL TRADITION¹

Ravigupta was either contemporary with Vāgbhaṭa or else flourished shortly after him. I have suggested the following provisional chronology as a working hypothesis : Vāgbhaṭa ca. AD 600, Ravigupta ca. AD 650, and Mādhava ca. AD 700.

The Mādhava-nidāna is a compilatory work containing many chapters entirely drawn from the classical medical writers Caraka, Suśruta, Vāgbhaṭa, and Ravigupta. Ravigupta's Siddhasāra on the other hand contains scarcely any verses that are identical with verses in Caraka, Suśruta, and Vāgbhaṭa.

There are verses in Ravigupta's Siddhasāra that so closely resemble those of Caraka that they cannot be regarded as an independent tradition. The most striking example is Si 5.68 compared with Caraka, Ci.3.286-7. These verses are found also in Vāgbhaṭa, Ci.1.148 in a form closely resembling Caraka. It is well known that Vāgbhaṭa contains many verses that are identical with verses in Caraka and Suśruta. The fact that Vāgbhaṭa contains virtually no verses identical with Ravigupta's may therefore indicate that Ravigupta is later than Vāgbhaṭa.

Ravigupta's distinctive contribution to Indian medical literature seems to have been the rearrangement of the traditional material into 31 chapters each dealing with a different topic. This arrangement was also adopted by Mādhava, whose order became more or less standard.

¹ See my article so entitled in *Indologica taurinensia*, 111-IV (1975-76), Torino 1977, 209-221.

2. RAVIGUPTA AND THE CONCLUDING LINES OF THE SIDDHASĀRA

The concluding verses (31.37) and the colophon give some information about Ravigupta :

'Having examined the teachings of Dhanvantari and of the son of Atri, I composed in this way as a guide to medical doctrines these thirty-one chapters, full of the ocean of Āyurveda, a drop of the water of healing, containing 1300 śloka in unbroken metre. On the insistence of his elder brother Devagupta, having regard to his (brother's) yellow disease, Ravigupta made this text.

Thirty-first chapter, on methods of treatment. The text of the Siddhasāra is the creation of Ravigupta, son of the veterinary doctor Durgagupta from the West. End of the book Siddhasāra.'

I have suggested that the Ravigupta who composed the Siddhasāra may have been the same as the Ravigupta who is said to have founded a cult of Tārā in Kashmir. According to the Tibetan Blue Annals the latter received the sādhanā from Tārā when he had been cured by Tārā of leprosy (*kluhi gnod-pa*) after praying for three months in a hut he had built west of the vihāra of Tārā in Kashmir. This legend concerning Ravigupta's being healed of a skin disease may be an imperfect recollection of the healing of his elder brother Devagupta of a skin disease. Curiously enough, the yellow disease of Si 31.37 is in Sanskrit *pāṇḍu-nāga*, not *pāṇḍu-roga*, which accords strikingly with the nāga disease mentioned by the Blue Annals.

The Blue Annals give an account of the transmission of the Tārā Ravigupta's teachings down to Dānaśīla, and it was a Dānaśīla who collaborated with Jinamitra to translate many Sanskrit works into Tibetan at the beginning of the ninth century. Jinamitra was one of the translators of the Siddhasāra into Tibetan.

Several works of the Tārā Ravigupta were translated into Tibetan and incorporated into the Tibetan canon. If Ravigupta's Siddhasāra were associated with the Kashmirian Tārā cult we would have an explanation for the decision taken by the Kashmirian translators to render the Siddhasāra into Tibetan rather than say Suśruta.

3. COLOPHON OF THE TIBETAN VERSION OF RAVIGUPTA'S SIDDHASĀRA

Following the Tibetan rendering of the Sanskrit colophon, the Tibetan version (P 248b; D 286a; N 236a) has the sentence :

rgya-gar-gyi mkhan-po jinamitra dañ 'atirgyavarma dañ ločhaba bandhe čandras
bsgyur-te gtan-la phab-bo

'The Indian pundits Jinamitra and Ādityavarman, and the translator, Reverend Candra, rendered and arranged it.'

Jinamitra is a well-known translator. He took part in the compilation of the Mahāvyutpatti in the first quarter of the ninth century. He is mentioned in the Chronicles of Ladakh as having been invited to Tibet as a translator by the Tibetan king Ral-pa-can. That he was a pundit living under

Ral-pa-can is attested also by the Chang-so chih-lun. Ral-pa-can's reign was dated AD 814-836 by Roerich.

4. THE TIBETAN VERSION OF RAVIGUPTA'S SIDDHASĀRA

The Tibetan version is extant in its entirety and contained in the Tibetan Tanjur.

For the Derge blockprint (D 191b-286b) see no. 4434 in *A complete catalogue of the Tibetan Buddhist canons*, ed. H. Ui, M. Suzuki, Y. Kanakura, T. Tada, Sendai, Japan 1934, p. 681.

For the Narthang blockprint (N 138a-236b) see 'Tome do 131 2.' in P. Cordier, *Catalogue du fonds tibétain de la bibliothèque nationale, III, Index du bstan-hgyur*, Paris 1915, p. 501.

For the Peking reprint (P 142a-248b) see no. 5877 in *The Tibetan Tripitaka reprinted under the supervision of the Otani University*, Kyoto, ed. D. T. Suzuki etc., vols 1-168, Tokyo-Kyoto 1955-1961.

The Tibetan version is a close and, for the most part, accurate prose rendering of the Sanskrit. Being a prose translation it has certain advantages over the concise verse translation of Vāgbhaṭa's *Aṣṭāṅgahṛdaya-saṃhitā*, of which the first five chapters have been studied in detail by C. Vogel (*Abhandlungen für die Kunde des Morgenlandes*, XXXVII.2, Wiesbaden 1965). The translation of the Siddhasāra includes at times additional matter in the nature of a commentary and was probably the result of the discussion held among themselves by Jinamitra, Ādityavarman, and Candra.

Several considerations have led me to choose the Tibetan version rather than the Sanskrit original as the basis of my English translation. Among those considerations are the relative clarity of the Tibetan version, its greater length, its close relation to the Khotanese version, and the fact that scarcely any material of this kind has hitherto been published. My edition of the Tibetan text with facing English translation is already complete and will constitute my next volume on Ravigupta's Siddhasāra.

5. SYSTEM OF REFERENCE

The usual method of numbering the ślokas of the Sanskrit text has not been adopted in the present edition. The numbering is designed to facilitate cross-reference between the Sanskrit and the Tibetan and Khotanese versions. By and large, the numbering is based on units of the Tibetan translation. Thus, 6.14 refers to an item found in Tibetan but not in Sanskrit, 22.2-5 refers to four sentences occurring in Khotanese and Tibetan but not in Sanskrit. An additional advantage of this system is that each recipe has a single reference number whether it is formulated in one śloka or in several. Where the number of Sanskrit lines forming one item is large, e.g. eight lines in 16.15, reference is added where necessary to the individual lines

by raised numbers e.g. 16.15⁶, or, where no ambiguity arises, by three numbers e.g. 16.15.6. In some cases, a separate section has been indicated by the use of three numbers. Thus, 3.20 in the Tibetan version has a heading 'Now the varieties of flesh are expounded' and there follow the particular varieties in 3.20.1-3.20.17.

As will be explained in more detail below, the Sanskrit MSS do not all contain the same verses. Sanskrit verses that have not been admitted into my text are referred to by a plus sign added to the verse after which they occur. Thus, 2.23+ refers to four verses found in MSS B and C between 2.23 and 2.24 of my edition.

6. THE KHOTANESE VERSION OF RAVIGUPTA'S SIDDHASĀRA

Substantial portions of a Khotanese version of Ravigupta's Siddhasāra are extant. The Khotanese version has been published in transcription by H. W. Bailey, *Khotanese texts I*, CUP 1945 (ed. 2 1969), 2-104 and *Khotanese texts V*, CUP 1963, 315-324.

The Khotanese version occurs in India Office Library Ch ii.002 and in Pelliot 2892. There are 64 folios of Ch ii.002, and the text of P 2892 corresponds to folios 5 to 14 of Ch ii.002. The recto of the first folio of Ch ii.002 bears the label '54 pattra sedasāra', that is, '54 folios Siddhasāra'. There are, however, 64 folios extant, as follows:

folio 1+1 bis	Introduction	2
folios 2-20	Chapters 1-3	19
folios 101-107	Chapters 13-15	7
folio 109	Chapter 15	1
folios 121-153	Chapters 18-26	33
folios 155-156	Chapter 26	2
		<hr/> 64 ff.

This disregards folio 100, which does not belong to the Siddhasāra.

The Introduction is found in Khotanese only. It has been translated and commented upon by H. W. Bailey in *A locust's leg, Studies in honour of S. H. Taqizadeh*, London 1962, 31-8.

The Khotanese version agrees closely with the Tibetan and claims to have been translated from Tibetan, but there are occasions on which it agrees with the Sanskrit against the Tibetan. The Khotanese version is probably to be dated to the tenth century.

7. THE SANSKRIT MSS (PALM-LEAF)

Five of the six Sanskrit MSS on which the present edition is based were microfilmed as part of the Nepal-German Manuscript Preservation Project. If it had not been for the work of this important project I may well have never discovered the existence of the only two complete MSS of the Siddhasāra.

The Nepalese MSS, written in Newari script, have been described in detail in my article 'New light on the Siddhasāra' in *BSOAS*, XXXVII.3, 1974, 628-654, and it will be sufficient to summarise the main facts here.

MS C is clearly dated by the colophon to Wednesday, September 9th, AD 1114 and is thus of respectable antiquity. MS B, probably to be dated to AD 1443, is a direct copy of MS C (see especially on 3.22.2+, 3.25.10+, 8.8). MS A may date to AD 1374. MSS D and E cannot be dated. MSS B and C were written at Patan in the royal palace of Mānigal.

MS M is a fragmentary worm-eaten palm-leaf MS in Malayalam script. Thanks to the generosity of Dr. N. S. Moos, Kottayam, S. India, in allowing this MS to be brought to Germany to be photographed, it has been possible to make use of this valuable MS in the preparation of this edition. As I did not receive MS M until 18.10.1978, that is, not until after my edition based on the five Nepalese MSS had been submitted for publication, it has not been possible to make full use of it. It was in my hands only until 4.12.1978, and in that time, which fell within a busy term, it was necessary to collect as much information as possible before handing it over to the photographers. However, the critical apparatus has been retyped in order to take account of the new readings provided by M and references to M as well as to the Nepalese MSS have been provided throughout by the addition of the folio numbers both recto and verso to the right of the text.

MS M consists of 53 folios in two sequences. Folios 1-50 contain the text of the Siddhasāra from 1.1 to 22.8+. A second sequence is provided by three further folios, which I have numbered *53, *54, and *55. They contain 23.16 to 24.26. At least two folios must have preceded *53 in order to accommodate the necessary 47 verses plus chapter title. These verses may have been spread over more than two folios if there were a sufficiently large number of additional verses inserted at this point, but that would seem unlikely since the assumption of two folios intervening already allows for a number of additional verses and the Nepalese MSS contain no additional verses between 22.8 and 23.16.

Chapter titles are found in M as follows :

- 1 iti tantrāddhyāyaḥ prathamah M 4r1
- 2 gaṇāddhyāyo dvitīyaḥ M 6r7
- 3 iti tṛtīyo ddhyāyaḥ M 10v8
- 4 iti siddhasāra-saṃhitāyām ariṣṭāddhyāyaś caturtthaḥ M 12v3-4
- 5 iti jvarāddhyāyaḥ pañcamah M 20r2
- 6 iti atisāraṣ ṣaṣṭho ddhyāyaḥ M 24r5
- 7 iti rakta-pittāddhyāyas saptamah M 25v6
- 8 iti kṣayāddhyāyaḥ M 27v10
- 9 iti gulmāddhyāyo navamah M 29v4
- 10 udarāddhyāyo daśamah M 31r6
- 11 ity ekādaśamah pramehāddhyāyaḥ M 32v1

- 12 iti k(u)ṣṭhāddhyāyo dvādaśaḥ M 34v8
- 13 ity arśo-bhagandarāddhyāyaḥ M 39r4
- 14 pāṇḍu-roga-kāmilāddhyāyaḥ M 40r9
- 15 iti hikkā-śvāsāddhyāyaḥ pañcadaśaḥ M 41r11
- 16 kāsāddhyāyaḥ ṣoḍaśaḥ M 42v3
- 17 iti tṛṣṇāddhyāyaḥ saptadaśaḥ M 43v3 (sapta written below pañca)
- 18 [iti] mūtra-kṛcchra-vṛddhy-addhyāyo stādaśaḥ M 44v11
- 19 [ity ud]āvarttāddhyāyaḥ ekona-viṁsatih M 45v11
- 20 u[n]mādāpa[smārā]ddhyāyo viṁsatih M 47v5
- 21 vātāddhyāya eka-viṁsatih M 50v5
- 23 iti visarppāddhyāyas trayo-viṁsatih M *53v9

In the present edition the chapter titles are based on the Nepalese MSS for the sake of consistency. For details see *BSOAS*, XXXVII.3, 1974, 636-643.

8. THE MS TRADITION

As is often the case with the transmission of Indian MSS, the tradition is contaminated so that it is not possible to establish a stemma codicum.¹ The only MS whose testimony is virtually without independent value is MS B, which was copied from C. There are only two places where B deviates from C. One is at 1.49, where B has the reading *rakṣana* in agreement with *rakṣaṇam* in Cakrapāṇidatta and Vṛnda against *pālanaṁ* in CDM, *pālanaḥ* in A. The other is at 3.19+27, where B (8v5) contains a verse that is not found in C. Otherwise B agrees entirely with C except in orthography and except where obvious errors in C are corrected or new ones are introduced by B.

The remaining MSS, the Nepalese MSS ACDE as well as the South Indian MS M, all contain unique readings that are of value for the constitution of the text. Moreover, the Khotanese and Tibetan versions also at times imply unique readings that represent an independent tradition. The Uighur version has not yet been studied closely enough for its relationship to the other MSS and translations to be determined.

In the case of contaminated tradition it is necessary to consider all available evidence in order to constitute the text since no one MS or group of MSS may be relied upon to present a reading closer to the original than that of the other MSS. In fact, all possible MS groupings are found. That is to say, the reading which may be presumed original may be provided by any one MS or by any group of MSS. Conversely, MS errors may be attested in one MS only or in any group of MSS.

Some examples follow of the uniqueness of particular MSS. For purposes of simplification the orthographical variations, which can be found in the critical apparatus, will be disregarded here.

¹ On contaminated MS tradition see S. A. Srinivasan, *Vācaspatimiśras Tattvakaumudī, Ein Beitrag zur Textkritik bei kontaminierter Überlieferung*, (Alt- und Neu-Indische Studien 12), Hamburg 1967.

MS A

The reading *pavanam* in A at 11.12 contrasts with *vamanam* in BCDM (E not available) and seems to be supported by the Tibetan version. The correct reading *pīta-* at 29.37 is found only in MS A but it is confirmed by the Tibetan version as well as by Mādhava, Vaṅgasena, and the Yogaratnākara. MSS BCDE (M not available) contain the error *plāvi* from 29.36. At 3.17+ MSS BCDM (E not available) insert two verses which are not found in A nor in the Khotanese and Tibetan versions. On the other hand, numerous additional verses are inserted everywhere in MS A that are not found in any other MS and are not indicated by the Khotanese and Tibetan versions. Moreover, the numbering and arrangement of the chapters in MS A are unique.

MS C

The readings of B and C are in principle identical as indicated above so that I refer to B-C in this paragraph as a single MS tradition. At 26.42 B-C has the correct reading *stimitāni*, implied by the Tibetan version, while AE have the common error *stimirāṇi*, which in D has been 'improved' to *timirāṇi*. M is not available. At 26.35 the reading *śakṛc* found in B-C and implied by the Khotanese and Tibetan versions is opposed to *yakṛc* in DE. The verse was omitted by A, and M is not available. The tradition is similarly divided between *śakṛc* and *yakṛc* in the parallel passage in Suśruta, Utt.17.17. At 5.126 B-C has the reading *kumuda-* in agreement with Bhāva and Vaṅgasena, but I have adopted in the text the reading *kusumbha-* from ADEM supported by the Tibetan. At 12.24 B-C presents the reading *viṣādi-ghnan* whereas the reading *viṣāvāpaṇ* ADM is supported by Vāgbhaṭa. B-C have numerous additional verses found only in that MS tradition.

MS D

At 5.125 D has the correct reading *śuktena* in agreement with the Tibetan against the common error *yuktena* in ABCM. At 11.4 D has the reading *bhāsinah* as implied by the Tibetan whereas ABC have *vāhinaḥ* and M has *vāhinā*. At 11.10.3 D has *tagara-* as implied by the Tibetan whereas ABCM have *nāgara-*. Chapter 11 is not available in E. D has *kṛtsnam* at 23.26 as indicated by the Khotanese and Tibetan versions against *kṛcchram* ABC (M broken out). At 5.136 only D has the spelling *khapura-* against *kṣapura-* ABCM. Additional verses are found in ABCE (M not available) at 26.15+, 26.33+, 26.50+, and 26.60+ but not in D and not in the Khotanese and Tibetan versions. Similarly, D agrees with these versions against ABCM (E not available) in not containing 3.31.17+, 12.5+, 14.20+, and 24.8+2. D rarely has additional verses that are unique to D (3.19+, 21.38+).

MS E

Of MS E less is extant than of the other MSS so that many critical places are not available for comparison. No additional verses unique to E have been found and the occurrence of additional verses common to A and E only at 5.132.1+ is noteworthy. At 13.48 E shares the error *kolā* with the Tibetan translation against *kālā* ABCD and *lākṣā* M. On the other hand, E and M share the error *mūlakaiḥ* at 5.119 against *madhukaiḥ* ABCD, which is supported by Anantakumāra, Bhāva, Vaṅgasena, and even the Paris Siddhasāra. At 5.76 only E and M have the correct reading *vidhāv evaṃ* as against *vidhānevaṃ* ABCD.

MS M

The value of the tradition represented by MS M is clear from the large number of instances in which M agrees with the Tibetan against all other MSS in providing what is evidently the correct reading. Examples are : 1.32 *śuci* M against *bhaktah* A, *dakṣaḥ* CD; 3.22.3 *vāta-* M against *śūla-* ABCD; 3.28.1 *kārśya-* M against *kapha-* ABCD; 3.31.9 *meho*^o M against *medo*^o ABCD; 4.26 *satatan* M against *sa-rutaṃ* BCD, *gurutaṃ* A; 5.9 *vipāka-* M against *mukha-pāka-* ABCD, *ḥpāka-* E; 5.62 *vami-* M against *mada-* ACDE; 13.19 *surādhyam* M against *palārddham* ABCD; 13.26 *cāsakṛt* M against *sādhayet* ABCD.

Since, on the other hand, the number of errors unique to M is even larger than that of the superior readings, it is not safe to adopt a reading from M without some supporting evidence. Thus, *anilaṃ* in M at 6.3 is evidently an error beside the correct reading *aruṇaṃ* ABCDE supported by the Tibetan and attested in Bhāva, Mādhava, Sodhala, and Vaṅgasena. At 21.3 I have adopted the reading *tad-ākṛtiḥ* found only in M because it is difficult to make sense of *tathā natiḥ* BC, *tad-unnatiḥ* A.

The additional verses provided by ABCD (E not available) at 12.11+ and 20.23+ are not found in M, which is thus in accord with the Tibetan tradition. But M has numerous additional verses elsewhere that are unique to that MS.

The Khotanese and Tibetan versions

In some cases the Khotanese version agrees with the Sanskrit MSS whereas the Tibetan implies a different reading. Thus, Khotanese supports ABCD *śuṇṭhī* at 26.68 whereas the Tibetan indicates *śṛṅgi*. M is not available.

In rare instances I have emended the Sanskrit text on the basis of the tradition implied by the Khotanese and/or the Tibetan version, especially where there could be found support in Indian medical literature. A certain instance is *mṛdvī* at 1.39 (see the apparatus).

At 25.3 where the Sanskrit MS tradition is divided between *tivroṣṇa*-AD¹E and *pītoṣṇa*-BC I have emended the text to *rāgoṣṇa*- after the Khotanese and Tibetan versions. M is not available.

9. THE CRITICAL APPARATUS

As long as only the two MSS A and B were known, it was my intention to include in the critical apparatus every variant, but the task became onerous and at the same time less necessary with the substantial increase in material afforded by the discovery of CDE. In addition, overloading the apparatus with the very numerous variations in spelling, omissions of akṣaras, etc. conceals the significant variations in reading. The apparatus is accordingly critical in the sense that it records every significant variation in the MS tradition but includes such items as spelling variants only in special cases. The reading of B has been included throughout even though it is a mere copy of C, because its evidence is confirmation that C has been correctly read.

The apparatus also includes information concerning the support given by the Khotanese and Tibetan versions for a particular reading and frequently also concerning parallels from medical literature. Full details will be provided in the commentary, but it is convenient to have a concise indication of the available evidence, especially while the volume containing the commentary has not yet appeared.

In the apparatus are to be found precise indications as to the location in the MSS of additional verses that are not included in the text edition.

10. THE EXTENT OF THE TEXT

The present edition does not include all the verses of all six MSS. Numerous verses are found in MSS A and M that are not contained in the other MSS. In the critical apparatus references have been given to all additional verses. The additional verses of which a reading has been provided in the critical apparatus have not been subjected to such intensive scrutiny as those verses in the text itself.

The additional verses in MS A are of a clearly secondary nature and were in the case of verses unique to that MS probably inserted by the writer of A himself. A has in any case substantially reorganised the material, as is clear from my discussion in *BSOAS*, XXXVII.3, 1974, 636-643 of the arrangement of the chapters in the MSS. Thus, A divides chapter 26 into five separate chapters and omits chapters 28, 30, and 31 altogether. In some cases, A has substituted passages from Vāgbhaṭa for the verses of Ravigupta (e.g. 26.117-124 replaced by Vāgbh., Utt.24.21-8). After 8.27 MS A inserts a chapter headed *vidradhy-adhyāyo navamaḥ* consisting of two passages from Vāgbhaṭa (see the apparatus). In many cases I have identified the source of the additional verses in MS A.

There has not been time to attempt to identify the additional verses contained by MS M, but it is clear from the fact that some have been

traced to Suśruta (5.81+ = Suśr., Utt. 39.69-71 and 7.1+3-4 = Suśr., Utt. 45.5-6) that they too are of secondary origin.

More significant than verses found only in one MS are those attested by more than one MS (counting B-C as one), since they are likely to go back at least to an older common source. In almost every instance they occur at the same place in each MS, that is, they are inserted between the same verses of the original Siddhasāra. The following cases occur :

ABCDEM	13.35.4+ 13.50+
ABCDM (E)	3.20.17+ 3.25.10+4-8 21.10+ 24.17+
ABCEM (? D)	13.35.4+1-2 (perhaps accidentally omitted by D)
ABCD (E) : M	12.11+ 20.23+
ABCE (M) : D	26.15+ 26.33+ 26.50+ 26.60+
ABCM (E) : D	3.31.17+ 12.5+ 14.20+ 24.8+2
ABC (E) : DM	3.26.7+
AE : BCDM	5.132.1+
BCD : AEM	5.81+
BCD : AM (E)	1.5.1+ 1.5.3+ 3.25.10+1-3
BCDEM : A	25.0
BCDM (E) : A	3.17+ 3.25.10+1-3 24.18.1+
BCM : ADE	5.137+
BCM : AD (E)	2.17+ 3.19+7 3.21.4+2 3.22.2+ 3.22.3+ 3.27.8+ 3.29.2+ 4.26+ 12.33.3+ 24.8+

'ABCD (E) : M' means that the additional verses occur in ABCD at the places indicated, that E is not available at that point, and that M does not contain the verses in question.

Readings of the above verses are found in the apparatus except for 26.60+.

Of particular interest are the sixteen verses on leeches added by BCDE between chapters 24 and 25 as a separate chapter called *jalaukādhyaṃya*. It is numbered chapter 25 in BC, chapter 26 in D¹, and is unnumbered in E. The numbering in BC and D has the consequence that there are two chapters with the same number since chapter 25 is *vraṇa* and chapter 26 *śālākya* in BCD in accordance with the Tibetan. The same verses occur in MS M, not as a separate chapter, but as additional verses, between 23.6 and the chapter title. The contents resemble Suśruta, Sū.13, but I have not noticed the verses themselves elsewhere.

The verses offered by ABCM only at 3.31.17+ are of interest because one of them is attributed by Aruṇadatta to the Siddhasāra. Similarly, 2.17+ in BCM only and 13.50+ 3-4 in ABCDEM are ascribed in the Yogaratnasamuccaya to the Siddhasāra.

The present edition contains only such verses as are found also in the Tibetan version and may therefore be presumed to be old since the Tibetan translation is older than the oldest dateable Sanskrit MS. The extent of

the text established in this way amounts to 2634 verses plus the mantra at 29.58. The 1300 ślokaś referred to in 31.37 (see 2. above) may thus be regarded as an accurate reflection of this total given as a round number. There is accordingly no justification for seeking to include additional verses in the text.

11. NORMALISATION OF THE TEXT

The spellings and sandhi of the edited text represent a normalisation according to the usual conventions. The Nepalese MSS show the usual variety of spelling; anusvāra and visarga are interchanged and irregularly employed, cerebrals and dentals are interchanged, the three sibilants are used at random, sandhi is irregular, b and v are not distinguished, sporadic doubling of consonants occurs especially in conjuncts. In MS B even the vowel quantities are irregular, especially i/ī and u/ū. The Malayalam MS by contrast is orthographically correct. The sibilants, cerebrals, and dentals are correctly written, anusvāra and visarga are not interchanged, and sandhi is almost always normal. In the Malayalam script b and v are clearly differentiated and they are on the whole reliably employed.

Where there is any doubt about the correct constitution of the text the exact spellings of all the MSS are recorded in the apparatus. This is done in abbreviated form. Thus, at 2.7.3 *viśoṣaṇaḥ* D (-so- A) (-n- BC) means that A has *viśoṣaṇaḥ* and BC have *viśoṣanaḥ*.

The arbitrary use of hyphenation in the transcription of the text is intended merely as an aid to the eye to enable the reader to pick out the individual items at a glance.

In the case of plant names I have normalised the spellings throughout without noting orthographical variants unless there is some doubt about the reading. Thus, I have normalised to *viḍaṅga* everywhere without indicating the frequent spelling *viḍiṅga*. Normalisation is particularly important for the purpose of making effective indexes.

My aim has been to present a correct text, that is, a text conforming to the accepted grammatical norms and yielding satisfactory sense. Where these requirements were not met by the MS tradition I have emended the text. Even if these emendations should not all prove to be correct — although my earlier emendations have been repeatedly confirmed by the readings provided by the discovery of additional material — they serve at any rate to draw attention to difficulties and provide an incentive for discussion and research. Further supporting arguments and discussion of the problems will be provided by the commentary, which is in course of preparation.

12. THE PARIS SIDDHASĀRA

On this MS see my remarks in *BSOAS*, XXXVII.3, 1974, 636. The MS is occasionally referred to in the apparatus as 'Paris'. It is a copy made

by K. Sampath Kumarachakravarthi between 15.11.1901 and 10.7.1902 at the G.O.M.S.S. Library, Madras, of the MS Madras R. No. 799, which differs only in containing additional matter in Telugu script. The MS is a medley of verses from the Siddhasāra and other medical texts occurring seemingly at random. It appears to be of no use in constituting the Sanskrit text.

13. PARALLELS AND QUOTATIONS

The reputation of Ravigupta's Siddhasāra can in part be gauged by the extent to which it was quoted. About half the verses of the present edition have so far been traced elsewhere. Additional identifications can certainly be made and what is listed here is only what I happen to have come across in the course of preparation of the edition, but it may be useful to provide this information already at this stage and supplement it in a subsequent volume.

Very rarely are verses found that are identical with those in the classical saṃhitās. Very frequently on the other hand are identical verses found in later sources. In some cases the parallel is not exact. This may be due to variant readings or a corrupt tradition: there are no editions of Sanskrit medical texts that are critical according to the standards that have become accepted in the domain of classical Latin and Greek scholarship, and it is difficult to make such editions under the special circumstances that prevail. It is accordingly sometimes difficult to determine whether we have to do with a verse containing the same information in a slightly different formulation or whether it is the same verse corruptly transmitted. I have not attempted to draw a sharp line since closely similar verses can also be instructive.

I am indebted to Dr. G.J. Meulenbeld for drawing my attention to a number of quotations from the Siddhasāra by commentators on other medical works. This information will be more fully utilised elsewhere.

14. LINE INDEX

I have included in this volume a complete line index by alphabetisation of the first pāda of each verse¹ in order to facilitate the location of parallels and quotations. If such indexes were available to other medical texts, all scholars working on them would be spared the enormous labour of searching for parallels. I hope that readers will be encouraged to compile such indexes and, making use of mine, will inform me of parallels they have been enabled to find by means of it.

¹ The pāda is thus an abbreviation of the verse and is therefore presented exactly as in the text and not with the sandhi form for the position in pausā.

15. THE SIDDHASĀRA-NIGHAṆṬU

I have endeavoured to show the importance of the Siddhasāra-nighaṇṭu in my article 'On Ravigupta's *gaṇas*' in *BSOAS*, XXXIV.2, 1971, 363-375. The author of the Siddhasāra-nighaṇṭu evidently regarded it as a courageous enterprise (*dhārṣṭyam uddhūya* SiN 193) to attempt to explain the obscure plant names (*dravyāṇām gūḍha-saṃjñānām* SiN 1) occurring in the Siddhasāra. We must be grateful to him for having done so, and I have provided a mechanical word index to the Siddhasāra-nighaṇṭu in order to facilitate its use. The text is followed by some preliminary notes concerning the contents of the Siddhasāra-nighaṇṭu. In the notes references are provided for confirmatory evidence for the equivalences given by the Siddhasāra-nighaṇṭu. The synonyms are listed in the order in which they occur in the Siddhasāra-nighaṇṭu but in the spelling in which they occur in the source from which they have been taken.

16. THE UIGHUR VERSION OF RAVIGUPTA'S SIDDHASĀRA

Eleven fragments of an Uighur version of Ravigupta's Siddhasāra were published in transcription by G. R. Rachmati, *Zur Heilkunde der Uiguren*. II, Berlin 1932 (Sitzungsberichte der preußischen Akademie der Wissenschaften, Phil.-Hist. Klasse, 1932, XXII), 20-32 [418-430]. Of these, numbers [I], [V] and [VI] were identified by H. W. Bailey (see H. W. Bailey, *Khotanese texts I*, CUP 1945 (ed.2 1969), vii and 133-4, and 'Medicinal plant names in Uigur Turkish', in *Mélanges Fuad Köprülü*, Istanbul 1953, 51-6).

The small fragments [VIII-XI] on pages 31-2 [429-430] have not yet been located. Fragments [I-VII] correspond as follows :

Manuscript Nr. 3

Si 6.19-27	[V] T II Y 46.	26 [424]
Si 6.28-37	[VI] T II Y 66.	28 [426]
Si 11.19-12.1 ⁵	[I] T II Y 27.	20 [418]
Si 12.4-12.11 ⁴ +	[VII] T II. Ohne Nr.	30 [428]
Si 22.1-16+	[II] T II Y 27. Y 17. Y 18.	22 [420]
Si 24.8-11 ⁴	[III] T II Y 18.	24 [422]
Si 24.19-23	[IV] (T II 2)	26 [424]

 2.23+ B (6r6-6v1) and C (4v2) insert here 4 vv. giving a gaṇa corresponding in content to
 the one which in Suśruta (Sū.38.16-7) and Vāgbhaṭa (Sū.15.28-9) also immediately
 precede the gaṇa 2.24. In yet a fourth formulation the gaṇa is found in VS p. 1068 (22).
 The gaṇa as formulated in B and C reads :
 arkaḥ śvete karañjau ca ghaṭā bhārgindra-puṣpikāḥ
 rāsneṅgudāv alarkaś ca tathā kālī viśodhanī
 arkādiko gaṇo nāmnā śleṣma-doṣa-vināśanaḥ
 krimi-kuṣṭha-praśamano viśeṣād vraṇa-śodhanaḥ
 The last of these verses is identical with Suśr., Sū.38.17.2 and Vāgbh., Sū.15.29.2.
 2.24.2 phāñji ACD (-i B) T VS Suśr. : bhārgī M Vāgbh.
 sugandhikāḥ CDM (śu- B) : sugandhakāḥ A
 2.24.3 viṣa-muṣṭiḥ CDT (-iḥ B) (-ti M) : varṣa-muṣṭi A
 2.24.4 maruvo ABCD : ma-ru-ka T : marico M VS
 2.24.5-6 Between 2.24.5 and 2.24.6 B (6v3) repeats 2.22.1, which, like 2.24.6, follows -vināśanaḥ.
 C (4v3) also repeats 2.22.1 here, but the verse has a line through it.

Verse 13 = VS p. 1083 (2ab).

3.21.3 M (7r7) omits from vāta-ghnī to nāḍicāḥ (3.21.4+2) by haplography.

3.21.4+ 4 vv. are inserted here by B (10r5-6) and C (6v3-4) only:

- 1 kausumbham sārṣapa-samam rājikaikānta-raktalā
- 2 nāḍicāḥ kapha-pitta-ghnaś cuṅcur madhuraḥ śītalāḥ
- 3 satīnam pitta-śleṣma-ghnam traiputam vāta-kṛn matam
- 4 śrī-hastinī sa-pattūrā mūtralāsmari-bhedinī

Of these vv. 1-2 were apparently contained in the MS on which M was based, since M (7r7) has:

cāṁgerī (3.21.3) followed by:

kapha-pitta-ghnī cuccur madhura-śītaḍā.

The immediately following words trapusam vātaḍam śākam in M are succeeded by a blank space and then 3.21.5 on the next line. It is not clear what relation they have, if any, to traiputam vāta-kṛn matam in 3.21.4+3b.

3.21.5+ 2 vv. are inserted here by B (10v1-2) and C (6v4-5) only:

- 1 prāyaḥ sarvāṇi śākāni viṣṭambhīni gurūṇi ca
- 2 rūkṣāṇi bahu-varcāmsi sṛṣṭa-viṇ-mārutāni ca

3.21.6 doṣa-kṛt ABCD : doṣaḍa[M (i.e. doṣalam)

5 sthīri-kara-tvaṃ dantānām snigdham saṅgrāhi bākulam
6 vāta-śleṣma-haraṃ rucyaṃ sraṃsanam tindi-phalam
7 doṣalaṃ lakucaṃ svādu jambīram ati-pittalam
- Between 3.22.2+2 and 3.22.2+3 B inserts 3.24.4-5, which, like 3.22.2+1-2, having at first been forgotten and omitted by C, was added at the bottom of folio 7r. Evidently B overlooked the caret marking the correct position of 3.24.4-5. It is accordingly clear that B was copied from C. This is further confirmed by the fact that, when B repeats 3.24.4-5 at B 11v3-4, it is still not in the correct position between 3.24.3 and 3.24.6 but between 3.22.14-5 and 3.23.1. C has carets in both places, having apparently first inserted the caret in the wrong place between 3.22.14-5 and 3.23.1 but not erased it.
- Of these verses 3-4 and 6-7 occur also in M (7v5-7) with the following variants :
4 nāraṅgasya phalam M for nāraṅga kapha-kṛd C (°kṛt(a) B) 6 vāta-pitta-haraṃ sāmlam M for vāta-śleṣma-haraṃ rucyaṃ BC
- 3.22.3 [gulma-]vāta- M KT : gulma-śūla- AC (-śū- B) (-sū- D)

184-185

The reading in the text follows E :

palārdha śuktiṃ icchanti tathā cāṣṭami[kā]m iti
 palaṃ bilvaṃ ca muṣṭi syā dve pale prasṛtaṃ vadet

BI CI D read as follows :

palaṃ bilvaṃ ca muṣṭiḥ syāt tathā karṣa-catuṣṭayam
 prasṛtaṃ śuktir gaṇḍūṣaṃ dvi-palaṃ cāpi kathyate

This is analysed by BII CII thus :

bilvaṃ | muṣṭi | karṣa-catuṣṭaya | palaṃ ||
 prasṛtaṃ | śukti | gaṇḍūṣa | dvi-pala ||

This means :

4 karṣa = pala = bilva = muṣṭi (as Vāgbh., Ka.6.27), and

2 pala = prasṛta = śukti = gaṇḍūṣa.

But śukti is elsewhere equal to 1/2 pala and gaṇḍūṣa is not otherwise known as a

178 (a)

bhatrlāga = mahā-śālī (not found)

mahā-śālī Si 3.1, 2 cf. Suśr., Sū.46.4 (D mahā-taṇḍulaka); Car., Sū.27.8 (Cpd mahā-
 śālir magadhe prasiddhaḥ). bhatrlāga may be a corruption of taṇḍulaka.

(b)

nīvāra = vālikā

nīvāra Si 3.6 cf. Suśr., Sū.46.21 (D nīvāra ulikā-dhānyam) and Car., Sū.27.16
 (A nīvāra uḍikā)

179 (a)

B 89r1

iti siddha-sāra-saṃhitāyāṃ nighaṇṭuḥ parisamāptaḥ

measure. In *Si* śukti occurs only once as a measure: *Si* 30.29, which closely resembles *Suśr.*, *CI*.40.28, where śukti is explained by *Ḍalhana* as dvātriṃśad bindavaḥ '32 drops'.

- 188 prasthaḥ prastha *BI*, prastha prastha *CI*, prasthaṃ prastha *D*, |prasthāś *E*
 189 kāmśaṃ pātraṃ *CI D* (kāśaṃ *BI*) : kāmśa pātraṃ *E*, kāmśa pātraṃ *BII*
 190 evamvidhi *BI CI* : evamvidhan *D*, evavidham *E*
 191 drava- *BI BII CI CII D* : dravya- *E*
 192 deśābhidhāna- *D*, deśā *E* : deśāvidhāna- *BI BII CI CII*
 193 dhārṣṭyam *E* : dhārṣṭam *BI CI CII D*, dhāṣṭram *BII*
 mayeyan *D* : mameyan *BI CI*, mameya *BII CII* : *E* not legible
 dik pradarśiteti *CI* (-s- *D*) (-drarś- *BI*) : dik pradarśitā *BII CII* : citravāśiteti *E* (?)

- 185 PALA = bilva = muṣṭi *Vāgbh.*, *Ka*.6.27
 2 PALA = prasṛta
 dve pale prasṛtas *Vāgbh.*, *Ka*.6.28
 186 4 PALA = añjali = kuḍava *Car.*, *Ka*.12.93
 187 8 PALA = aṣṭa-māna = mānī
 mānikā = 8 pala *Vāgbh.*, *Ka*.6.28
 mānī *Si* 16.15.6 and 21.14 tr. *Tib.* sraṇ bryad '8 pala'
 aṣṭa-māna is usually distinguished from mānikā. Thus, *Car.*, *Ka*.12.92-3 (dve pale
 prasṛtaṃ viduḥ / aṣṭa-mānaṃ tu vijñeyam kuḍavau dvau tu mānikā) is
 understood to indicate that aṣṭa-māna = 2 pala and mānikā = 8 pala. But
 aṣṭa-māna is said to be 4 pala in *Śā* p. 8 (25-6). aṣṭa-māna does not occur
 in *Si*.

- 188 4 kuḍava = 1 prastha (= 16 PALA)
 4 prastha = 1 ādhaka (= 64 PALA)
Car., *Ka*.12.94
 189 (a) kāmśa = pātra (= ādhaka = 64 PALA ?)
 kāmśa = bhājana = ādhaka *Vāgbh.*, *Ka*.6.28
 But pātra = ādhaka and kāmśa = 8 prastha (= 128 PALA) according to
Car., *Ka*.12.94.

(b) tulā = 100 PALA

tulā pala-śatam *Car.*, *Ka*.12.97; *Vāgbh.*, *Ka*.6.29

- 190-191 The stated measure is taken for dry substances (śuṣka-dravyeṣu) but double the stated
 measure in the case of liquid and fresh substances (drava-dravyeṣu cārdreṣu). This is
 the general rule found also in *Car.*, *Ka*.12.98-9 and *Vāgbh.*, *Ka*.6.23. *Caraka* exempts
 from doubling measures stated in terms of pala or tulā, while *Vāghaṭa* exempts measures
 below a kuḍava (4 PALA).

WORD INDEX TO THE SIDDHASĀRA-NIGHAṆṬU

Excluded are : api, atha, iti, eva, ca, tat, tatas, tathā, tasya, tu, ya-, vā, sa, sā, hi. References are complete for each word.
